Sukkot 5 Senses: Pomegranate Exploration for Young Children

Explore pomegranates, a symbolic fruit of the season,
using the 5 senses

Step 1: Cut a pomegranate in half

Step 2: Use spoons, a magnifying glass, or any other “detective” materials for a sensory experience

What does the pomegranate look like on the outside? What about the inside? Listen closely as you break the pomegranate apart. What can you hear? Smell the inside of the pomegranate. Does it smell sweet or sour? What do the seeds feel like? Can you squish them with your fingers? Taste a seed or some pomegranate juice. How does it taste? Do you like it?
